Mihai Starpitu

Automation & Process Engineer | Pharma Equipment | Siemens TIA Portal | GMP | Commissioning
Crailsheim, Baden-Württemberg, Germany

Summary

Automation & Process Engineer with hands-on experience in pharmaceutical machinery, GMP-regulated environments and turnkey pharmaceutical projects. I am passionate about programming, engineering and industrial automation. My technical background was built through my studies in Automation and Applied Engineering, complemented by continuous self-development in PLC programming and industrial control systems. Currently working as a Freelance Consultant at Optima Pharma GmbH via NEO - Professional Solutions GmbH, supporting pharmaceutical equipment projects involving process sequence development, harmonized standards, commissioning activities and close collaboration with Software Development, Qualification and Documentation teams. My experience combines pharmaceutical process engineering with automation-related activities, allowing me to bridge the gap between process requirements and machine control logic. I have worked extensively with process sequences (step chains), pharmaceutical isolators, while collaborating closely with automation engineers throughout the project lifecycle. I hold Siemens TIA Portal PRO1 and PRO2 certifications and continuously develop my skills in industrial automation, PLC programming and machine control systems. Core competencies: • Industrial Automation • PLC Programming (Siemens TIA Portal) • Pharmaceutical Equipment • Process Sequences + P&ID Schematics • GMP-Regulated Projects • Commissioning & Startup Activities • Cross-Functional Engineering Collaboration • Documentation & Qualification Support Open to opportunities in: • Automation Engineering • PLC Programming • Commissioning • Pharmaceutical Automation • Industrial Control Systems

Experience

NEO – Professional Solutions GmbH
Automation & Process Engineer | Freelance Consultant

July 2025 - Present (1 year 3 months)

Germany

Freelance Automation & Process Engineering Consultant at Optima Pharma GmbH via NEO - Professional Solutions GmbH.

- Defined and optimized process sequences (step chains) for pharmaceutical isolator and filling systems.
- Acted as interface between Process Engineering, Software Development, Qualification and Documentation teams.
- Collaborated closely with other automation engineers to ensure correct implementation of process logic and machine functionality.
- Reviewed functional concepts and automation-related documentation for GMP - compliant pharmaceutical equipment.
- Applied Siemens TIA Portal knowledge and automation engineering principles in daily project activities.
- Supported harmonized standards development across pharmaceutical machine projects.

Heitec AG

Automation & Process Engineer

November 2023 - July 2025 (1 year 9 months)

Germany

Assigned to Optima Pharma GmbH, supporting pharmaceutical equipment projects with a focus on process engineering and automation-related activities.

- Defined and maintained process sequences (step chains) for pharmaceutical isolator systems.
- Gained hands-on exposure to Siemens TIA Portal, pharmaceutical machine automation and GMP-regulated environments.
- Collaborated closely with Software Development, Qualification, Documentation and Mechanical Engineering teams.
- Supported the development of harmonized process standards across multiple machine projects.
- Reviewed functional specifications and process documentation for GMP-compliant pharmaceutical equipment.
- Acted as interface between process engineering and automation teams to ensure alignment of process requirements and machine control logic.
- Participated technical discussions, design reviews and project coordination activities throughout the machine development lifecycle.

- Supported commissioning activities for pharmaceutical equipment, gaining hands-on experience in machine operation, troubleshooting, process verification and automation-related workflows.

Education

Faculty of Automatic Control and Computers, specialization systems engineering - University Politehnica of Bucharest

Computer Science · (October 2021 - July 2023)

Faculty of Power Engineering, Industrial informatics specialization, University POLITEHNICA of Bucharest

Student, Industrial Engineering · (October 2017 - July 2021)
